

## PN-101 PLASTIC PRIMER

PACKAGE

0.75L / 3L / 9L

DRYING TIME

2-4 Hours

CONSUMPTION

3-5 m<sup>2</sup>/l

### Description

PN-101 is a plastic primer used for coating surfaces before painting, in new and old surfaces. It can be used for concrete, cement, plaster, gypsum, etc. It is most used for indoors. PN-101 stabilizes the surface and increases the adhesion between the paint and the wall surface.

### Application

The surface that will be painted must be dry (free from moisture) and free of dust, solid debris or oils. It is recommended that the damaged parts must be repaired before application. PN-101 is a water-based primer. It is ready to use. Apply with brush or roller.

### Coverage

PN-101 covers 3-5m<sup>2</sup>/L depending on the surface.

### Drying Time

Touch dry in 2-4 hours in good dry conditions.

### Package

0.75L, 3L and 9L.
