

AN-601 NEODUR

AN-601 NEODUR is an emulsion based on acrylic resins, organic solvent with high penetrating ability on any type of porous surface.

PACKAGING
0.75L/4L/16L

DRYING TIME
2 Hours

CONSUMPTION
12 m²/L

Description

AN-601 NEODUR is an emulsion based on acrylic resins, organic solvent with high penetrating ability on any type of porous surface.

Area of Use

-It is used to ensure the adhesion of water-based paints to highly porous substrates made of concrete, masonry, façade render and gypsum boards.

Substrate Preparation

The surface to be primed must be dry and free of dust, grease, dirt, etc.

Application

AN-601 NEODUR is stirred and applied over the substrate by brush, roller, or spray.

Consumption

It covers 12m²/L depending on the surface.

Features

Technical Data (IN +23° C AND 50% U.R.)

Density	0.8-1g/cm ³
pH	7
Viscosity	1000-2000 mpa*s
Intermolecular Force	20000-40000 mpa
Drying Time	2 Hours
