

# NE-355 D3 GLUE

Ready to use, water resistant, polyvinyl acetate homopolymer emulsion adhesive for wood.

## PACKAGING

0.5KG/1KG/5KG/20KG

### Description

NE-355 D3 GLUE is a ready to use, water resistant, polyvinyl acetate homopolymer emulsion adhesive for wood.

### Area of Use

It can be used in interior areas where there is frequent short-term exposure to water or moisture and frequent high humidity. It can be used for gluing all types of wood, wooden materials and flat laminates. It can be used for fixing paper, cardboard, paper or textile-backed PVC cloth to wood and board. It can be used to bond outdoor timber constructions such as window-frames and external doors, and it is particularly suitable for moisture-resistant bonds which must fulfil high demands.

### Substrate Preparation

The surface should be dry and free of dust, oil, grease, loose particles, etc.

### Application

NE-355 D3 GLUE can be applied using mechanical glue spreader, brush or hand roller and air activate glue gun.

### Consumption

It covers 0.20-0.25kg/m<sup>2</sup> depending on the surface

### Storage

Recommended storage temperature: 5 °C–38 °C. Containers should remain sealed and stored in a cool, dry environment.

### Features
